Erick Brown

AI Automation Expert | Software Engineer

erickib0211@gmail.com +63 935 981 3980 Angeles City, Central Luzon, PH LinkedIn

PROFILE

I have 8+ years of experience in software development, architecture, and building scalable applications, including 2+ years specializing in AI automation and AI-powered solutions. I specialize in Frontend Development, Backend Development, Database Development, AI & Automation, and Software Engineering. I help startups and businesses build modern web applications, develop SaaS platforms, automate workflows, integrate AI, and improve existing software systems. My goal is to deliver reliable, scalable, and cost-effective solutions that solve real business problems, save time, improve productivity, and support business growth.

PROFESSIONAL EXPERIENCE

Senior AI Engineer 03/2024 – 09/2026
Qingdao Sun Valley Information Technology Service Co., Ltd. Japan

- Engineered and deployed AI-powered solutions using machine learning, deep learning, and Generative AI, automating 4 business workflows and reducing manual processing time by 15%.
- Developed and integrated LLM-based applications and Retrieval-Augmented Generation (RAG) pipelines, improving information retrieval efficiency and response accuracy by 10%.
- Collaborated with cross-functional engineering teams to optimize AI model performance, reducing response latency by 5% and improving system scalability.
- Led AI development initiatives, established engineering best practices, and mentored 7 developers, improving deployment efficiency and reducing production issues by 20%.

Software Developer 10/2023 – 12/2024
Dsoft Joint Stock Company Japan

- Designed, developed, and maintained scalable software applications, improving application performance and supporting many active users.
- Collaborated with software engineers, UI/UX designers, and product managers to deliver some features aligned with business requirements and project deadlines.
- Improved software architecture and code maintainability through reusable components and optimized development practices, reducing development.
- Diagnosed and resolved complex technical issues, reducing application errors by 10% and improving system reliability and performance.

Fullstack Developer 04/2022 – 09/2023
CollabUX Web Solutions, Co. Philippines

- Collaborated with cross-functional teams to implement new features, optimize user interfaces, and resolve complex technical issues.
- Established coding standards, conducted code reviews, and enhanced application maintainability through reusable components.
- Performed cross-browser and regression testing, documenting 150+ test cases to support reliable software releases.
- Mentored junior developers and contributed to Agile development processes, sprint planning, and technical decision-making.

Frontend Developer 06/2020 – 02/2022
SOMETHING TECHIE Philippines

- expanded responsive production interfaces using React, javaScript, Tailwind CSS.
- Optimized frontend performance using code splitting and lazy loading, reducing application load times by 40%.
- Diagnosed frontend performance, application behavior, and executed maintainable fixes.

Web Developer 05/2018 – 07/2020
Bizwind Philippines, Inc. philippines

- Developed and maintained many responsive web pages using HTML, CSS, and JavaScript, ensuring consistent functionality across desktop and mobile devices.
- Collaborated with senior developers to deliver some website enhancements, improving user experience and website functionality.
- Performed cross-browser and responsive testing, resolving many compatibility and layout issues to improve website stability.

EDUCATION

Bachelor's in Degree 05/2014 – 03/2018
Sunway University Philippines

- Earned a Bachelor's degree with a strong foundation in software engineering, specializing in algorithms, data structures, object-oriented programming, database management, and system design.

SKILLS

Frontend
HTML5, CSS3, JavaScript, TypeScript, Tailwind CSS, React.js, Next.js, Vue.js, Angular

Backend
Node.js, python, PHP, Java, C#, .NET, GraphQL, Websockets, RESTful API, API Integration

Database
MySQL, PostgreSQL, MongoDB, GraphQL, Supabase, Firebase, SQL Query Optimization

AI Automation
AI Workflow Automation, Intelligent Chatbots, API Automation, AI-Powered Applications

Cloud & DevOps
AWS, Docker, CI/CD, Git, GitHub, GitHub Actions, Cloud Deployment

Software Architecture
System Design, Scalable Architecture, Microservices, SaaS Development, Performance Optimization, Design Patterns, Object-Oriented Programming

PROJECTS

Educational Website

- Developed responsive and user-friendly web pages using modern frontend technologies.
- Built interactive interfaces for course listings, educational content, and school information.

Dental Healthcare Website

- Built interactive interfaces for dental services, clinic searches, and appointment booking.
- Merged dynamic content and reusable components to improve website functionality.

Dynamic Web Management Platform

- Developed responsive and user-friendly websites using modern frontend technologies.
- Built clean, reusable components to improve code quality and maintainability.
- Implemented responsive layouts for desktop, tablet, and mobile devices.
- Boosted website performance, functionality, and cross-browser compatibility.

Multi-Agent AI Automation Platform

- Developed AI-powered automation workflows using Python, Large Language Models (LLMs), and multi-agent architectures.
- Blended LLM APIs, external tools, and third-party services to extend AI agent capabilities.

Beauty & Cosmetics E-Commerce Platform

- Built product listings, search functionality, filtering, and shopping cart features.
- Integrated APIs to manage product data, customer accounts, and orders.
